BACKGROUND:

I believe in consistently providing superior, personal, and responsive service. My desire is to work closely with clients in order to thoroughly understand their objectives and goals so that I can help develop creative strategies to efficiently solve their problems and prevent additional problems from arising in the future.

My role is to try to alleviate the burden and stress that comes with litigation in order to make it easier for my clients to focus on their business and what is important to them. I have an ability to take very complex issues and break them down into simple, relevant pieces of the puzzle. I enjoy using my skills to work with individuals and companies to develop successful strategies that are unique to that client's wants and goals.

My motivation comes from a desire to provide excellent, efficient service that allows clients to focus less on disputes and more on aspirations.

REPRESENTATIVE MATTERS:

I have successfully represented a broad range of clients in civil litigation disputes, including business owners, individuals, condominium homeowners' associations, and contractors. The disputes have included breach of contract claims, ownership disputes, promissory notes and personal guarantees, employment claims, construction defect claims, insurance recovery, and intellectual property protection. For example some recent results:

Successfully represented franchisee against one of the largest real estate companies in the Western U.S.

- In 2022, Becki was lead counsel for a franchisee in an arbitration against a large, well-known franchisor. The claims included breach of the franchise agreement, tortious interference, and unjust enrichment. After the arbitration hearing, the Arbitrator entered an interim award for a net amount of approximately \$5 million in favor of our client. The parties ended up settling all claims shortly thereafter.

Successfully represented shareholders in closely-held company disputes.

- In 2021, Becki was lead counsel for a minority shareholder in a lawsuit against the majority shareholders. We won summary judgment invalidating an alleged stock option agreement that the majority shareholders attempted to use to force a sale of our client's ownership interest in a privately held company. Shortly thereafter, we were able to get the case resolved.
