BACKGROUND:

Helping businesses make an impact in their industries has always been my passion. My experience in developing creative solutions for companies began with my own small business in a small town. As a teen, my father and I teamed up to launch, manage, and develop a chain of bicycle shops near our neighborhood to support our family. Coming up with strategies to steer that business to success was what inspired me to become a corporate attorney.

As a corporate attorney, the businesses I work with now are much larger and operate in diverse industries. My degrees in law, public relations, and public policy give me a unique perspective in advising them. I use these areas of expertise to craft multifaceted solutions which address my clients' needs from a variety of angles. I relish working closely with clients and developing custom work that's tailored to their companies.

PRACTICE AREAS:

Company Formation and Financing
General Corporate Counsel
Securities
Basic Contracting
